***Re: REACH REGULATION**

The Regulation (CE) N° 1907/2006 of European Parliament concerns the registration, evaluation, authorization and restriction regarding chemical substances and it has the aim to increase the knowledge of the risks coming from an incorrect use of the chemical substances.

Parà declares that none of the products specified by the Reach Regulation as restricted, are included in the articles put on the market in concentration higher than what is allowed by the same Regulation.

In particular none of the products indicated in the following documents of the Reach Regulation is included:

- Attachment XVII (please see Oeko tex certification herewith enclosed)
- Attachment XIV

Furthermore none of the product SVHC (Substances Very High Concern) indicated in the Candidate list is included in Parà articles in a concentration higher than 0,1% in weight.

Best regards

PARA' S.P.A.
